Lean six sigma certification cost in india

The LSSGB course with Mr. Deepak was a great online learning experience. We were free to ask questions throughout the sessions. The session was interactive, with a lot of practical examples. Simplilearn is a great institute for learning. The support staff is accommodating and professional. Any time you need any help, they are ready to provide it. I am also impressed with the teaching methods and techniques. I would highly recommend Simplilearn to anyone for a great career. The experience has been very good so far. No improvements needed. I like the interactive chat and how the instructor responds to questions/feedback in real time. I have taken up 2 courses i.e. LEAN Management and Certified Lean Six Sigma Green Belt. The clarity and understanding of the courses were too good. I have cleared both the exams in single attempt as the course was detailed enough. Thank you! It was worth it. Training was very good, and I have learned quiet a lot. The trainer has excellent knowledge and I am glad that I was a part of this training program. Excellent course material. The trainer was very passionate and the examples chosen was simple and easy to understand. I still find it difficult to forget these examples. Great sessions! Concepts were explained very clearly and in simple words. All the doubts were cleared on the spot. Overall, it was an incredible learning experience. I have completed the Lean Six Sigma Green Belt Training with Simplilearn. The sessions were informative and interactive. The trainer had a lot of industry experience, which helped us understand the concepts easily. The training material was comprehensive and self-explanatory, as well. I had enrolled for the Lean Six Sigma Green Belt certification with Simplilearn, taught by Vikas Gera. The classes were practical, full of live examples, and helped simplify the complicated, technical jargon. The faculty was extremely knowledgeable and experienced. Thank you, Simplilearn!! I took a certification course of Lean Six Sigma Green Belt from Simplilearn. I have understood the concepts so well that I now implement all of them in the organization. After the certification, I also got a new job with a great salary hike. Simplilearn is a great platform for the professional courses. Their course contents are really good and easy to understand. They have the best trainers in the education industry. There support team is really good and have a solution to almost every query. I had enrolled in Lean Six Sigma Green Belt certification at Simplilearn. It was my first experience of pursuing an online course and undoubtedly, it proved to be a great choice! The learning platform offered is outstanding. Simplilearn's Lean Six Sigma Green Belt certification was a nice experience. The trainer was very cooperative and highly knowledgeable. Thank you Simplilearn! I have joined the Lean Six Sigma Green Belt in Simplilearn. It has been a great learning process. The trainer is helpful and teaches with patience. Overall I am happy with my decision. A big thumbs up to Simplilearn. My trainer, Ayesha, is extremely knowledgeable and very patient. Simplilearn's learning platform is user-friendly and easy to access too. Just imagine this scenario... Six Sigma Green Belt Certifications in India - It's a Monday Morning. You reached your office at 9 am in Bandra, Mumbai. It's a typical day. You are busy as a bee here, shuttling between meetings and presentations. The clock strikes 12 at noon. Your office door opens and there you find, clad in a white shirt and pajama, with a crisp Gandhi topi perched comfortably on his head, a dabbawala standing with your dabba in his hand, full of sumptuous, home-cooked food waiting for you to gorge on. Has it ever struck you how these dabbawalas manage to do this! Day after day, your lunch Dabba is delivered on time and picked up, again on time to reach back the same home where it came from, on the same day. There are 5000 dabbawalas serving dabbas to 200,000 office-goers in Mumbai every day. DMAIC cycle According to a Harvard study, it is this unique proficiency of their system, which attributes to less than 3.4 defects to a million opportunities, which in turn implies that out of every million dabbas that need to reach from a million homes to their respective offices and back, at most, only 3 could miss reaching the right desk at the right time. This gives them a rating of 99.99999 as per the Forbes Magazine's quality assurance study conducted in 1998. Dabbawalas have also got ISO 9001-2000 certification for their Excellence in service. This, my dear friends, is a real-life example of Six Sigma accuracy and what it can achieve for you. Technically speaking, Six Sigma is a set of management tools and techniques formulated to improve business by ameliorating room for error. It is a data-driven strategy that uses a statistical methodology and data analysis to do so. Six Sigma is employed with a clear-cut objective; that of delivering quality and virtually flawless goods/services for business transformation ensuring optimal consumer satisfaction. So here is a list of the Top 10 Six Sigma Green Belt Certifications available in India. 1. The IASSC Certified Lean Six Sigma Green Belt Exam is a 100 question, closed-book, proctored 3 hour exam. It comprises 20 MCQ and true/false questions from all major sections of the IASSC Lean Six Sigma Green Belt Body of Knowledge. This Certification exam is conducted in more than 8,000 Testing Centers located in 165 countries throughout the world and also through the IASSC Web-Based On-Demand testing system, by hundreds of IASSC Accredited Providers. Six Sigma Certification V/S Lean Six Sigma Certification: the difference and how to make a choice? Six Sigma focuses on quality improvement by eliminating variation and minimizing defect rates in production processes through statistical analysis. The customer and the end product is at the core of any Six Sigma strategy. Lean methodology, on the other hand concentrates on reducing costs by elimination of waste and improving process efficiency. It works to reduce the process variation, resulting in a quicker cycle of iterative improvements. Together Six Sigma and Lean generate a robust toolkit not only for addressing waste reduction but also for identifying and solving quality related issues through the the DMAIC method. So if you already have experience in supporting quality improvement projects, Six Sigma Green Belt is a good option for you. However, if you do not have any experience, Lean Six Sigma Green Belt is a better choice as it also has no prerequisites for learning. You get to learn both; Six Sigma DMAIC process and the Lean manufacturing process. Conclusion: As we are all aware, Business Analytics is the world's fastest-growing domain. In this scenario, the importance of Six Sigma certification cannot be understated. For professionals, consistent skill upgradation is vital for remaining competitive and employable in today's business world. As a Lean Six Sigma Green Belt, you possess the key skills required to implement, perform, interpret and apply Lean Six Sigma processes to improve the quality of any goods/ processes and make them cost-effective. Six Sigma practitioners are highly sought after in all sectors and industries as process improvement and quality control are an indispensable part of operating a profitable business in any domain. As an employer too, you will be more than relieved to know that your production lines are being run by professionals whose main priority is quality. In terms of salary, according to Glassdoor, an American Website showcasing insights on top jobs and companies, a Six Sigma Green Belt certified professional can expect an average yearly salary of \$68,840 per year. Moreover, the ability to add Six Sigma Certification to your resume also goes a long way in establishing your commitment to improving your business understanding and analytical skills, as well as enriching the organisation where you work. Several lucrative career choices for Six Sigma professionals are Six Sigma Analyst, Six Sigma Green Belts and Black Belts, Six Sigma Consultant, Business analyst, Quality analyst, Manufacturing engineers, Compliance engineers, and Operating system specialists. FAQs Q1. What does IASSC stand for? Ans: IASSC stands for the International Association for Six Sigma Certification. It is an independent third-party certification body dedicated to the growth and enhancement of Lean Six Sigma standards across the world. Q2. What is Lean Six Sigma In India? Ans: Lean Six Sigma is a methodology that relies on a collaborative team effort to improve performance by systematically removing waste using lean manufacturing techniques and Six Sigma tools to remove the eight kinds of waste: defects, overproduction, waiting, non-utilized talent, transportation, inventory, motion, extra-processing.
